

Lachlan Deck

Projects

Full Stack React-MySQL Website

as part of the RMIT full stack developement course working in 2 person groups, we're tasked with building a site to handle teacher's aid applications, I worked on front-end components, built API's, contributed heavily to the TypeORM classes, and worked with some graphql subscriptions and visualisations. **tech:** TS, Express, TypeORM, GraphQL, Tailwind, and Node

Deploying AI monitoring tool on AWS

this is what im currently doing in my final semester at RMIT, I cant be too specific about it, but they have a reporting tool that scrapes their public courses website that creates a report based off the results, we're tasked with adding a test suite and fixing up the deployment.

tech: ec2, lambda, bedrock, docker.

Nix (passion project)

This has been a hobby project of mine, Nix is a declarative functional programming language, think of it as a non-container way of solving the problems docker solves. For the last year I've been experimenting using various Nix ecosystem tools like Home Manager in my studies, right now I am using it to replace Homebrew on my Mac.

Personal Information

- Phone: Provided on request (via Email)
- Email: lachlan@decks-awash.com
- GitHub: github.com/Lachlan-Deck/

Skills/Experience

- I've recieved positive feedback for my proactive communication and time management
- I'm experienced in working through workplace and team conflict, and maintaining a happy and open professional attitude
- I try to be fun to hang out with, I can gasbag about d&d, coffee, japanese culinary knives, bouldering, motorcycles and plenty else
- Self-directed learner, I spend a lot of my free time jumping into tech rabbit holes, and exploring new technologies

Education

- Bachelor of Information Technology
- Enterprise Software Development Major
- 2022 – > Present
- Graduating July 2026

Prior Work

Chef:

- I was a chef and worked in hospitality for three years before starting my degree

Volunteering

Student Mentor

- Due to high academic achievement my 1st year I was able to apply for the Vygo/RMIT student mentor program
- when accepted to the program mentors take a training course and then are able to respond to queries on the vygo platform
- As a student mentor I've been able to respond to coursework questions and help students with php developement
- As a Result of my mentoring experience I feel like I've gotten valuable experience triaging students issues, and creating an un-judgemental space for them to express and work through their challenges and uncertainties
