

Lachlan Deck

Projects

RMIT – Final-year industry project

Enhancing an internal reporting tool that scrapes the university's public course website to generate analytics reports. Responsible for designing and implementing an automated test suite and improving the deployment pipeline to increase reliability and maintainability.

tech: ec2, s3, bedrock, docker.

Full Stack React-MySQL Website

Built a teacher's aide application portal in a two-person team as part of the RMIT full stack development course. Developed front-end components, REST APIs, and TypeORM models, and implemented GraphQL subscriptions and data visualisations. Gained experience collaborating in a small team, navigating differing working styles, and delivering a project that met course requirements with a strong final grade.

tech: TS, Express, TypeORM, GraphQL, Tailwind, and Node

Nix System Administration (Personal Project)

Using Nix to declaratively manage development environments and user-space configurations across multiple devices. Can configure reproducible development environments, manage packages, and maintain consistent setups between macOS, Raspberry Pi, and desktop systems using tools such as Home Manager. Recently leveraged this setup to provision a full local development toolchain on a Raspberry Pi 4 from a single setup script.

Culture fit

- I've received positive feedback for my proactive communication and time management.
- I'm experienced in working through workplace and team conflict, and maintaining a happy and open professional attitude.
- I like hanging out with people. I'm interested in tabletop games, coffee, Japanese culinary knives, bouldering, and motorcycles.
- I'm an eager learner, I spend a lot of my free time jumping deep-diving on technologies.

Volunteering as Student Mentor

- I was selected for the Vygo/RMIT student mentor program based on strong academic performance.
- Provided support to students by answering coursework questions and mentoring them in web development.
- I developed skills in triaging student issues. Fostered a non-judgemental, supportive environment for students to discuss and worked through challenges and uncertainties.

Education

- Bachelor of Information Technology.
- Enterprise Software Development Major.
- 2022 → Present.
- Graduating July 2026.

Prior Work as a Chef:

- I'm a qualified chef and worked in hospitality for three years before starting my degree.
- I really value the teamwork, and conflict resolution skills I gained working in hospitality.
