

Lachlan Deck

Projects

Deploying AI monitoring tool on AWS

This is what im currently doing in my final semester at RMIT, They have a reporting tool that scrapes their public courses website that creates a report based off the results, we're tasked with adding a test suite and fixing up the deployment.

tech: ec2, s3, bedrock, docker.

Full Stack React-MySQL Website

As part of the RMIT full stack developement course working in 2 person groups, we're tasked with building a site to handle teacher's aid applications, I worked on front-end components, built API's, contributed heavily to the TypeORM classes, and worked with some graphql subscriptions and visualisations. **tech:** TS, Express, TypeORM, GraphQL, Tailwind, and Node

Nix System Administration (Personal Project)

I've been using Nix for fun to declaratively manage development environments and user-space configurations across devices. This includes configuring reproducible dev environments, managing packages, and maintaining consistent setups between my Mac and Raspberry Pi, and desktop systems using tools like Home Manager. Recently I was able to leverage this setup to get my dev tools running locally on a raspberry pi 4 with a single setup script.

Technical Experience in:

- Database Usage(**MySQL**, SQLServer, SQLite, MongoDB)
- Object-Oriented Programming (**Java**, **Python**)
- Web Development (JS, TS, **TypeORM**)
- Linux Nerd (**Git CLI**, **lazygit**, NixOS, Helix, shell scrips.)

Skills/Experience

- I've received positive feedback for my proactive communication and time management
- I'm experienced in working through workplace and team conflict, and maintaining a happy and open professional attitude
- I try to be fun to hang out with, I can gasbag about d&d, coffee, J%apanese culinary knives, bouldering, motorcycles and plenty else
- I'm an eager learner, I spend a lot of my free time jumping into tech rabbit holes, and exploring new technologies

Education

- Bachelor of Information Technology
- Enterprise Software Development Major
- 2022 – > Present
- Graduating July 2026

Prior Work as a Chef:

- I'm a qualified chef and worked in hospitality for three years before starting my degree
- I really value the teamwork, and conflict resolution skills I gained working in hospitality

Volunteering

Student Mentor

- Due to high academic achievement my 1st year I was able to apply for the Vygo/RMIT student mentor program
- As a student mentor I've been able to respond to coursework questions and mentor students in web development
- As a Result of my mentoring experience I feel like I've gotten valuable experience triaging students issues, and creating an un-judgemental space for them to express and work through their challenges and uncertainties
